GSA is the place for you to access all information relating to academic affairs for the graduate students

Introduction

For coping to reach our goal of constructing the "Top and small sized medical university that sophistically composed by both the professional concern with humanity and solid fundamental research along with clinical", Office of Graduate Student Affairs holds the whole plot of graduate students nurturing, which combines streams of energy from national and academic projects as the step stones, and brainstorm from the directions of "curriculum design" and "innovation with profundity on research scope."

On curriculum design, we exert ourselves to benefit our graduate students to root on the courses emphasizing both theories and practices, to steady the learning quality, and to reinforce their competitiveness.

On research of innovation with profundity, we have integrated the best faculty here and internationally to open the view and vision for our graduate students to provide the top thinking pattern and inspire their creativities.

1. Talent mining: We provide chances for college students to explore themselves, and lead to the complete selection system toward Master's and doctoral programs.
2. Nurturing the talents: We integrate our school and international faculty and provide the best program curriculum to reinforce the basic academic training for our graduate students. With such a solid academic foundation, we
